Anomaly Detection

Proactively detect cost anomalies

Challenge

Unexpected spending spikes can quickly escalate into larger cost issues if not identified early. Because continuous monitoring is complex and time-consuming, these anomalies often go unnoticed until they have significant financial impact.

Solution

Zesty Insights continuously monitors your cloud environment to detect unusual spending patterns, alerting you in real-time before costs escalate. With customizable thresholds, you can easily set alerts to maintain control over your expenses proactively.

Benefits

Real-time
cost anomaly detection

Customizable
spending alerts

Granular monitoring
across services

How it works

- 1 Zesty is granted IAM role access permission
- 2 You connect your CUR to Zesty platform
- 3 Zesty Insights collects your workload usage and pattern histories
- 4 AI algorithms analyze data in real-time
- 5 Zesty Insights generates alerts when spending deviates
- 6 You can additionally set thresholds by service, workload, and account to receive customized alerts
