

Eliminate unused resources effortlessly

Challenge

Limited visibility into costs and resource utilization complicates the identification of underutilized or unused resources. Reducing waste requires continuous, time-consuming monitoring.

Solution

Zesty Insights continuously monitors resource utilization, and delivers real-time, granular visibility into underutilized and unused cloud resources, enabling teams to focus on the most impactful actions to eliminate unnecessary costs.

Benefits

Effortlessly identify unused resources

Prioritize the highest potential savings

Eliminate cloud waste across services in minutes

Supported services

EBS S3 ELB EIP NAT Gateway VPC PrivateLink CloudWatch Kinesis Data Streams

How it works

- 1 Zesty is granted IAM role access permission
- 2 You connect your CUR to Zesty platform
- 3 Zesty Insights collects your workload usage and pattern histories
- 4 AI algorithms analyze data in real-time
- 5 Zesty Insights generates recommendations to reduce unused resources
